

SIoux PRESSURE WASHERS

FOR THE FOOD AND BEVERAGE INDUSTRY COMPACT, ALL-ELECTRIC PRESSURE WASHERS AND STEAM CLEANERS FOR MAINTENANCE IN MANUFACTURING AND PROCESSING FACILITIES

Sioux's line of 100% electrically driven and electrically heated All-Electric pressure washers and steam cleaners are ideal for use in restricted spaces in the food and beverage industry. They sterilize equipment and maintain buildings and facilities. The all-electric design produces no flames or exhaust, and can be used in locations where fuel-fired units would be dangerous or prohibited by law or safety codes. These units do not require exhaust stacks, gas lines or fuel tanks and can be easily moved for use in multiple locations. Any unit can also be built to explosion-proof standards for use in hazardous locations.

Sioux offers a compact all-electric combination steam cleaner and high pressure hot water washer, which is ideal for cleaning in processing facilities. This unit measures only 35"H x 18"W x 47"L, featuring easy maneuverability in tight spaces in mixing, manufacturing, storage and shipping areas. The unit features two cleaners in one: 2.6 GPM at 600 PSI at 140°F for high pressure hot water washing, and 0.8 GPM at 200 PSI at 320°F for steam cleaning. Hot water will blast away grime, sludge and food particles from production and filling

machinery, conveyors, loading docks, buildings and grounds. Steam will quickly and thoroughly remove grease and oil, melt ice, and disinfect surfaces.

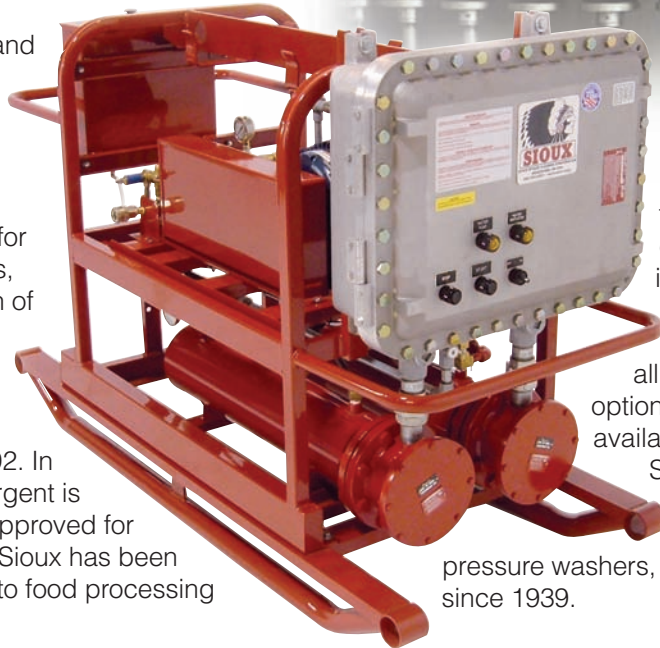

Sioux all-electric cleaners provide hot water or steam quickly and continuously, even during extensive periods of operation, maintaining optimum cleaning capability. Thus, cleaning can be done effectively and at a faster rate than with other brands, which often use a holding tank as a heat source. As the holding tank is depleted, discharge temperature decreases, which can dramatically reduce cleaning effectiveness.

SAFETY AND RELIABILITY

Today's managers now face increased pressure to improve productivity while complying with governmental safety regulations such as the Clean Air Act and OSHA regulations. Sioux units are third-party certified under UL 1776 and CSA 22.2 No. 68. Sioux All-Electric units also meet the National Electric Code (NEC), the Canadian Electric Code (CEC), and comply with OSHA regulation 1910-303(a), which specifies that all electrical equipment be certified as meeting required codes by a Nationally Recognized Testing Laboratory.

Sioux All-Electric cleaners produce no flame or exhaust, and emit no contaminants into the surrounding air. Thus, the cleaner is ideal for enclosed spaces in food processing facilities, where clean air for workers is mandatory not only for health and productivity reasons, but also to avoid contamination of the food products produced. Explosion-proof models for hazardous locations are also third-party certified under UL-1203 and CSA C22.2 No. 30-92. In addition, Sioux's Liquid A detergent is biodegradable and is USDA-approved for use in food preparation areas. Sioux has been providing All-Electric cleaners to food processing

firms worldwide to maintain clean facilities, reduce equipment downtime, extend equipment life, and improve plant productivity.

Sioux units can be custom built to meet required specifications for all cleaning applications. Custom options, including multi-gun systems, are available by consulting the factory. Sioux Steam Cleaner Corporation has been manufacturing quality-built, American-made steam cleaners, pressure washers, water heaters and steam generators since 1939.

APPLICATIONS

- | | |
|--|--|
| • Wash down conveyors | • Sterilize production equipment |
| • Clean mixing and storage containers | • Wash floors and walls |
| • Remove food particles and disinfect surfaces | • Clean loading docks, buildings and grounds |

NO PORTION OF THIS LITERATURE MAY BE REPRODUCED WITHOUT EXPRESS PERMISSION OF SIOUX STEAM CLEANER CORPORATION.

Sioux has been manufacturing All-Electric pressure washers and steam cleaners for the Food and Beverage industry for over 35 years! A wide range of custom options are available including controls, alternate electricals, frames, tanks, trailers, and other accessories.
