

Sioux **Custom Cleaning** **Equipment for the** **Paper, Logging &** **Forestry Industries**

INDUSTRY LEADER IN **APPLICATION-SPECIFIC EQUIPMENT**

For over 65 years, Sioux has been the industry leader in custom-built industrial cleaning equipment. Whether it's in the maintenance shop, the timber stand, the sawmill, the paper-making operation or on the logging road, pressure washers and steam cleaners are a vital maintenance tool critical to each phase in pulp and paper production.

Saw mills use pressure washers to remove rock and sand which in turn saves on replacing expensive blades. Using pressure washers in timber stands to clean chain saws is also common. Clean saws cut more efficiently, last longer, and allow for easier safety and maintenance inspections.

Pressure washers and steam cleaners are used for preventative maintenance and repair. They are used to quickly and thoroughly dissolve oil and grease off equipment so that mechanics can see where the problems are and then complete the work. Preventative maintenance is the key in keeping sawmill and logging equipment running.

Identifying and repairing cracks and leaks can add years to the life of machinery, reducing operating costs

Other applications may include cleaning dirt, grime, dust, oil, grease, resins, bleaches and chemicals off of rolls, filters, forklifts, balers, conveyors, and other machinery. Keeping equipment clean can reduce downtime for boilers, evaporator concentrators, bleaching towers, pulp drain lines, conduit runs, and dryer belts. Even log truckers use pressure washers to keep their rigs clean.

Options for hot water pressure washer and steam cleaner models include fuel-fired models (Oil, LP or Natural Gas) or all-electric models (electrically heated and electrically driven). Explosion-proof models are also available for use in hazardous (explosive) areas. Custom options include alternate electricals, water tanks, stainless steel frames and heating coils, gas engines, diesel engines, generators, custom dimensions, custom mountings, and more!

TYPICAL APPLICATIONS

	STEAM CLEANER	HOT PRESSURE WASHER	COLD PRESSURE WASHER	COMBINATION STEAM & HOT PRESSURE
Clean chain saws in timber stands	X			X
Wash rock and sand off of blades and equipment in saw mills		X	X	X
Clean dirt, grime, grease, resins, and chemicals from rollers, conveyors, and filters		X	X	X
Maintain boilers, evaporator concentrators, bleaching towers, pulp drain lines, wire pitts, and dryer belts	X			X
Wash log trucks, forklifts, balers, and other machinery	X	X		X

"X" Indicates the best unit for each application. Combination units are ideal for all applications.

Sioux is the industry leader in custom, application-specific designs. A wide range of options are available, including explosion-proof designs, 50 Hz electricals, custom frames, water tanks, trailers, and other accessories to provide the EXACT equipment you need.
