Pressure Washers for Transportation and Ground Support Equipment Maintenance

MOBILE PRESSURE WASHERS CLEAN GROUND SUPPORT EQUIPMENT

Sioux's mobile hot pressure washers and steam cleaners are great for maintenance of ground support equipment and for cleaning aircraft bodies. Units can be mounted on an over-the-road trailer for cleaning at remote locations. They are excellent for cleaning baggage handling equipment, tows, and

carts and are ideal for degreasing engines and equipment before rebuilding. They also can be used to remove paint. Ratings are 2-8 GPM, 100-3500 PSI.

Self-contained units are available which incorporate the engine driven cleaner or generator and water tank with hose reel on a towable trailer.

ALL-ELECTRIC PRESSURE WASHERS CLEAN WITH NO AIR CONTAMINATION

Sioux features 100% all-electric steam cleaners and hot pressure washers for general vehicle maintenance, steam cleaning engines before rebuilding, cleaning dirt and grime off jet engines, and general maintenance of buildings and facilities. These electrically driven and heated units can be used indoors or outdoors, and produce no flames or exhaust. They require no preheating and no recovery time; thus, hot water or steam is available instantly and continuously for unlimited time periods. Explosion-proof models are available for use in hazardous areas containing combustible fluids or materials.

DE-ICER/STEAMER MELTS SNOW AND ICE FAST

The Sioux Model 200-GTT is a de-icer/steam cleaner which is ideal for the transportation industry. It is great for remote equipment cleaning and maintenance. The unit will de-ice frozen valves, controls and equipment, as well as melt snow and ice off surfaces while cleaning. It also doubles as a conventional steam cleaner which can be used year-round in the shop for ground support applications such as cleaning engines, equipment and buildings. Optional attachments make this unit into a weed eradicator or ant lance used to kill colonies of fire ants.

The 200-GTT is completely self-contained. It is mounted on a heavy-duty trailer, with a 240-gallon stainless steel water tank, gasoline generator and hose reel. The generator provides auxiliary power, with receptacles for lighting and tools. The tank is ideal for water supply, chemicals or de-icing solutions. The unit provides 200 GPH steam and can be powered from its self-contained generator or from your existing electric panel.

TYPICAL APPLICATIONS

	STEAM CLEANER/ DE-ICER	HOT PRESSURE WASHER	COLD PRESSURE WASHER
Cleaning ground support equipment, buildings and facilities	X	X	X
Degreasing engines and motors	X		
De-icing runway lights and signs, culverts, roofs, valves and pipes	X		
Quickly melting snow and ice off many types of surfaces	X		
Cleaning grime and dirt off hangar walls, floors, and aircraft bodies		X	X
Washing off baggage handling equipment, tows and trucks	X	X	X
Weed eradication or destruction of fire ant colonies	X		

Sioux is the industry leader in custom, application-specific designs.

A wide range of options are available, including explosion-proof designs, 50 Hz electricals, custom frames, water tanks, trailers, and other accessories to provide the EXACT equipment you need.
