

Sioux Pressure Washers

Dependable Cleaning Equipment for Oil & Gas Applications

EXPLOSION-PROOF PRESSURE WASHERS IDEAL FOR OFFSHORE FACILITIES

These are no wimpy pressure washers! Sioux All-Electric steam cleaners and high pressure hot water washers will stand up to your most demanding cleaning jobs. They are great for general maintenance as well as cleaning oil-based mud, grease, sludge, grime, and for thawing frozen lines and drains.

Built with a rugged, steel frame and quality components, these heavy-duty machines aren't afraid to take a pounding. Explosion-proof models are designed for operation in hazardous conditions. The galvanized frame option inhibits corrosion from the elements.

Third party certified to UL-1776 and CSA C-22.2 No. 68-92 for safety, these powerful cleaning machines can be used indoors or outdoors. Because an All-Electric cleaner produces no fumes, exhaust or flames, it can be used safely in areas that cannot tolerate air contamination.

With a Sioux cleaner, discharge water temperature is maintained during long periods of operation. This results in optimum cleaning capability, unlike other brands which often use a holding tank for the hot water - as this

is depleted, discharge temperature decreases, reducing cleaning effectiveness.

Explosion-proof cleaners are available for use in potentially hazardous or volatile areas. Explosion-proof models are additionally third-party certified to UL-1203 and CSA C22.2 No. 30.92.

Sioux Cleaners have been used for over 30 years in offshore applications, and are in operation in over 70 countries worldwide. Our current offshore customers include most major oil companies throughout the world.

Sioux manufactures 45 standard models of all-electric steam cleaners, pressure washers and combination units. Standard ratings range from 0.6 to 5.75 gallons per minute, and from 100 to 3,000 PSI. An extensive array of options are available to enhance performance, including 50 Hz electricals, SCR temperature controls, and hose reels. Sioux specializes in providing custom units to meet your exact specifications. We have the engineering staff and experience to provide drawings and submittal packages for the most complex projects worldwide.

PRESSURE WASHERS SAFELY CLEAN REFINERIES & PETROCHEMICAL FACILITIES

Sioux's line of All-Electric pressure washers are great for applications in refineries and petrochemical processing facilities. These cleaners are ideal for general plant maintenance as well as cleaning grease, oil and grime.

Sioux's All-Electric pressure washers are designed for indoor or outdoor use. They emit no contaminants into the surrounding air. There is no flame, no fuel, no fuel storage and no exhaust.

APPLICATIONS

Clean oil-based mud, oil and grease from platforms and rigs

Wash walkways, floors, walls, and catwalks

Clean salt, sludge and grime from rig and platform surfaces

Degas tank cars and oil tankers

Clean fuel tanks

De-Ice frozen valves, pipes, equipment and drains
